

## Class evaluation

All testimonials are genuine and (excerpts) derived from class evaluation forms. Heluo wishes to thank the contributors.

### Xuan Kong Fei Xing Feng Shui

I would highly recommend Heluo's classes. He has great knowledge and is a good teacher. The explanations he gives go into a huge amount of detail and he makes sure that each and every student understands every concept he teaches. By comparison to other teachers the class fee is very cheap for what is taught. The class 9 but the food 5. Workbook, performance and knowledge of the teacher excellent.

Vicky Moane  
Sharjah-UAE

The workbook is a treasure! Every new reading of the vast amount of information reveals new things! Well done! Would like an index to the material though, because of its vastness. The curriculum offered way exceeds the class fee. I would give a 10 for performance and knowledge to express my gratefulness and admiration for this, but as this would imply perfection I refrain from it. But I can only hope to once also possess this knowledge and be aware of the Cosmic Connection! If you want to deepen your knowledge of Feng Shui to a cosmological level, and be amazed and filled with awe for Oriental Metaphysics: go for it! Thanks again Heluo!

Herman van  
Roey  
Antwerp - B

Superb, I have no words to say it in another way. I got understood all difficult things which I encountered in Forum. I got understood the basics, it is important for me. I think that if I would attend once more that course, I would grasp even more things, which I didn't realized now because of my little previous knowledge. Lessons – their form and curriculum – excellent. Nice atmosphere. Rather American way of teaching. This is also the way of teaching of the best teachers in Universities in Canada. Such lesson is pleasure for listeners. Heluo has good elocution and good voice. I am to much beginner to evaluate that, but intuitionally I feel the teacher is of the highest level and real class. Presentation and personality of Heluo make the lessons pleasure for listeners. I have never seen better workbook. It will serve me long years. I attended that course for learning Feng Shui and also for an inspiration for my scientific work in the field of psychology. I discovered completely new, exciting world of knowledge on the level which I never had any idea about. Very good price and it attracted me. I don't regret. Rather my friends who didn't attend – they regret after I told them how it was!

Owczarek Maria

My experience is from an absolute beginners point of view, so everything that was shown to me was completely new. It is absolutely fascinating and revealing.

Monique  
Wallast

Heluo is a very passionate teacher who is capable of transmitting knowledge and explanation on the subject of Classical Chinese Feng Shui. It is obvious that Heluo has a lot of knowledge and is extremely enthusiastic. I can't give evaluation since I don't have comparison.

I find it all very intensive and even overwhelming but I know that after these four days all the knowledge that I picked up will settle. I therefore recommend this course to everybody who is interested or even has a slight interest. Trust me, you won't be disappointed. Very Good; you are a perfectionist and want to explain everything, almost impossible.

Very Good; you are a perfectionist and want to explain everything, almost impossible.

Eveline

I am for long time excited with new knowledge shared by Heluo. Wonderful teacher can have only wonderful lessons. His articles give already quite new view of Feng Shui, the way of putting in order our knowledge. I was impatiently waiting for the classes. Now – after the course – I must say it was worth. I was given answers for many questions. I got understood many principles, I got new knowledge. Suddenly all became more clear and understandable. It gives me more certainty during the consultation. The way of sharing knowledge by Heluo is great. The knowledge is shared very attractively and intriguingly. Quite new view of some Feng Shui aspects is fascinating for me. I can also think in new way now and it is an adventure for me. The most important is however that I was given the tools, which make me able to work autonomically, researching in Feng Shui, draw my own conclusions and analyzing. My impressions after course? Fascinating! Although I am tired I feel satisfaction.

Grazyna Czajka  
Bartosik

Tremendous knowledge and I have an impression that Heluo very willingly shares it with us, nothing leaving for himself. Not all Masters do like that.

Grzybowski  
Andrzej

It was a meeting with remarkable personality who has level of knowledge high exceeding our possibilities to evaluate. But Heluo's manner and contact teacher-student make easy to understand tremendous amount of knowledge. Uncomparable to other courses, I mean so much knowledge! All asked question were answered.

Paniuticz  
Arkadiusz

Fantastic, full of reliable knowledge. Great material for study for years. Original personality, guiding to our personal development and farther studying.

Kowalik  
Jadwiga

Lessons were exciting, very 'energetic', positive and they gave me much new knowledge about Feng Shui.

Kasprzyca  
Patrycja

Great course, learned a lot, at least someone who tells you all the real 'origins' of Feng Shui. For absolute beginners it may be intensive.

Nicky Beentjes

Workbook constructed clear and comprehensible. It will serve for very long time indeed. It helps in independent work. I trust him. I appreciate frankness, sincerity and engagement. He has tremendous knowledge and can be an inspiration for further learning and research. I appreciate the way of sharing knowledge very much.

Jeziorska-  
Klimek Jolanta

## Class evaluation

### Four Pillars of Destiny

For me, four days in a row is heavy. I understand that it's difficult where people come in from outside the country. Workbook is very good! Lots of knowledge, clear explanation, very willing to teach and share. I again enjoyed Heluo's class very much. Integrating science, philosophy and metaphysics, the teacher is able to keep you alert and hungry for more for the full four days.

Anneke Kruit

I think Heluo's skills are very high and he loves to teach and share what he knows. The teaching of Heluo integrates a wholistic approach to cosmos & destiny from the eye of metaphysics and science.

Cristina  
Mestres

I regret I have not joined the class before. Both teacher and participants were sublime.

Denise Janssen

## Class evaluation

All testimonials are genuine and derived from class evaluation forms. Heluo wishes to thank the contributors.

### Nine Star Ki

Your real enthusiasm and pointing out connections to deeper levels, cosmic levels, are thrilling and absolutely stimulating, not to mention your independence and autonomy in these matters which I appreciate enormously! I am glad you ask a bigger fee than last year, because you do bring quality! Also, I am glad at this level I can still afford it! Enthralling, stimulating in a very intense and joyful, open-minded way, and leaving you frustrated when class is over because it's over...

Herman van  
Roey  
Antwerp - B

Wow, if you want to become a good teacher, you need to have taken this class.

Marco Elshof

Even if I'm in NSK study for 9 years, this teaching brought my knowledge on higher level & deeper understanding which broaden my view.

Vojko Kalan

This course change life!

Line de Paep

### Specialization seminar

#### 9 Star Divination –Personal and Global events

Heluo's classes cover many subjects and wet your appetite to learn even more. The workbook is very extensive and provides study material for weeks or even months of study. Heluo is very generous and takes good care of his students. A nice class room, easy to reach from the international airport. Very intimate setting, makes you feel like part of Heluo's family. A more strict timetable may be appreciated.

Heluo's compassion and devotion shine through all the time. The presentation might seem a little chaotic, but he leaves no question unanswered and he follows his structure while still being open to the spontaneous flow of the moment.

The workbook is terrific. It contains a treasure of information, carefully lay outed, written by a knowledgable person. Heluo is very knowledgable. His devotion and enthusiasm easily infect his students. The materials offered live and in print are worth much more than charged.

Robert Schmitz  
Berlin

### Specialization seminar

#### 9 Star Divination –Personal and Global events

Review on Heluo's workshops "Xuan Kong Feng Shui and Nine Star Ki", held at the end of August 2003 in Perm".

These notices are difficult to call a review in full. These are rather my own impressions from this workshop. It is to say, that before the workshop I tried to study Feng Shui and Four Pillars of Destiny myself using books available in our country in Russian (translation of Raymond Lo, Eva Wong and other authors). But nevertheless this is my deep persuasion that it is impossible to understand the true depth of each teaching only when studying books. It is necessary to communicate with a live master and if the master becomes too your Teacher, this will raise the disciple to a qualitatively new level. Just this happened to me on the Heluo's workshop.

I received a very strong incentive in my own development and in studying of Feng Shui and other aspects of Chinese Metaphysics. Now I do much practice. I calculate the influence of Feng Shui on flats and offices of my friends. The booklet that I received on the workshop became too my reference book. I reread it again and again and each time I find new details and nuances that passed earlier by my perception. I investigated with great pleasure the Binary Model of the Universe and the Chinese Cosmogony. Now after this workshop I look in other way on the earlier written books of Eva Wong and Raymond Lo. I see their contradictions and reticences.

With each new practical order I start to understand and feel better the Heluo's statement that the Feng Shui specialist has to feel the Qi flow and has to build stories based on this sensation. I see that there is no limit for perfection and it is seemingly that my next step in Feng Shui studies will be my questions to Heluo in correspondence per email.

Furthermore I would like to understand deeper and to practice the Nine Star Ki. I'm not satisfied with my contemporary level. The booklet I received on the workshop is not enough for me. I see that for movement forward it is necessary to master the initial level at first. On my opinion we had too little workshop time for Nine Star Ki.

I learnt the essence that "organs produce emotions" and that "the best school for the Feng Shui specialist is practice".

The main impression from the workshop I could express with one phrase: "Wonderful! But why so little!" We need workshops regularly! At least once a half year or year.

But I hope to receive answers of my questions directly from Heluo per Internet.

### Xuan Kong Feng Shui

In days from 5–8 May 2004, Roel Hill (Heluo) - Master of FengShui entertained in Poland. For over a year which preceded a course we kept a contact with the Master, through forum. This magnificent man gave our Polish group more your time and energy.

He gave us some materials which enabled us to study on our own, he was always ready to help us also. In that time I noticed that even though this material concerned rather basic knowledge about FengShui, there was something new, something that interested me and has changed my point of view on FengShui and everything else, which can be connected with it. I've been studying FengShui for about 10 years, although I should write - I've been learning FengShui for over 10 years, because Heluo caused that I've started to STUDY FengShui, not learn it. It's a big difference for me. He was a man, who gave us across informations in a very splendidly easy, and clear way. We can think that it's not a big thing, but these first articles teach me how to study FengShui, not how to accept "on believe" some rules. I could look at FengShui from a different point of view, from a point view of the explorer, or scholar. It sounds proudly! It was amazing, fascinating, because I could go on a journey, where all elements started to fit to each other. Suddenly I broaden my horizons, I started to see everything on the same time.

But why am I writing about it?? Now, like everywhere in the world we meet with many teachers and masters FengShui. Each of them teach in a different way, not only because they are representatives of different schools, but also because they present some things in a different way. It can cause a big disorientation and we don't know where it comes from. We have a lot of problems: which teaching apply in our practice, what is true?. But the worst is that we often don't know who's right and where we can find the answer. In my journey through FengShui I met a lot of teachers and each of them taught me a lot, I respect them and appreciate that they shared their knowledge with me. That's why I don't judge here anything. My aim is to show everything that is really valuable in Heluo's teaching and absolutely worthy of tell.

His teaching is different from teaching of other great teachers and masters and of course it can be a supplement for knowledge which we had already gathered, but there is something more. I've been thinking what could it be? It's obvious that Chinese teachers pass this knowledge on the different way than teachers from the West, but there is something more. Heluo's FengShui Class was predicted as a one-module whole, plus thick workbook, which is a supplement for the material passed on verbally. Studying this book is a work for a several of months. Knowledge which is passed on verbally is not copying and going through the book. This two parts are two half's of one big whole.

Before the class started I had known what is the contents of that workbook and I was wondering how Heluo will make it, because it seemed to be impossible to read a material from that book in such a short period of time (4 days). But impossible became possible...and it surpassed all my expectations. The class with Heluo had, at least, three levels for me: - level connected with normal knowledge passed on by Master, - level

when the self-existent understanding of rules obliging in FengShui took place, possibilities of independent references to informations, which are base of these rules, - and level, which weren't written and said, but it existed. It's maybe too early to make far-reaching summary of this class, because it's still persisting (for me). Maybe because only studying of this book is still lasting. But we know, its too little said. It's a big simplification, because when I finish studying this workbook for the first time, I'll do it again and again.

The one I can tell for sure, that this class has changed my point of view on FengShui. Now I can see this wider and deeper. My way of learning has changed too. Now it is studying, searching for the answer and analyzing, not only acquiring rules. A lot of questions has found their answers. Of course some new questions appeared, but they are totally different. Now, these are questions from the "higher shelf". Studying became the beautiful, and exciting way, not a painful acquiring maxims and rules. Understanding of these maxims and rules, knowledge, from where they are come from and where to find them, set me free from uphill, memory studying. Value of this class increase for me with every single day, when I become absorbed with another part of my studies and this is how this class is still lasting...

Yes, it's absolutely true - Heluo is able to pass on an huge, incredibly huge knowledge in force, during only a few days. He can change a passive participant of the class into explorer and discoverer. This is the most valuable! Alongside of the knowledge which he gave to us. The way of his explanation is very interesting and so different from which I experienced till now. I don't know what is the phenomenon of that kind of teaching all about, but this course was and still is a specific pearl in my journey through FengShui.

I can tell you one more thing - it doesn't matter when I'll get to the last page of the book and it doesn't matter how many times I'll study it. Important is how beautiful way I can follow right now, visiting new, unknown territory of FengShui knowledge. You can feel that all limitations has stopped existing. Then, 4-day course with Heluo passed like one day...

I received additional, quite new "tools". Someone can tell: "it's always like that, we go on a new classes, there is a new knowledge, new tools". Basically it's true, but....we often get "fish" and I got "fishing-rod". And now, I can fish on my own, I can put a different measure to my analyses or study over FengShui. I've become more self-contained. Heluo showed me the rule and where it comes from. I can feel that I received a boat which I can sail, sail wherever I want! I can also change my life and life of my great clients. I saw FengShui from a different side and I can add - unknown before! Astronomical references are something new for me, but it's just a grain of sand on a desert.

As a matter of fact, I can't turn into words my thankfulness to Heluo for everything he gave us. We could say: that's great, wonderfully, I'm under impression, we could write a lot of words, but it's still not enough. It is still too little. Our language is too poor, we can't send by means of our language the subtlety, which give us a picture of "thing". For me the course is a big step forward in understanding FengShui. It will be a great honour for me, if someone after reading my words will decide to take part in course with Heluo, and thus, will decide to take part in a journey through the time and space, through new levels of FengShui knowledge and become an explorer without any limitations. Thank you for everything!

Schoolgirl,  
Kryśka

### Xuan Kong Feng Shui

I would like to refer to you a few remarks I have regarding the Dutch Feng Shui teacher – Roel Hill – Heluo. These remarks have been confirmed and strengthened whilst reading the handbook, which is constantly being updated and developed – as the author himself admitted.

It is a rare occasion that we have the possibility to meet a teacher like Heluo in these times of commercialism. His teachings are undoubtedly filled with strong ideas that he truly wants to realize in different corners of the world.

My colleagues who also attended the seminar have told mostly everything that needs to be said about that event in the descriptions they have published. Not much can be added without being redundant. I would like to draw your attention to one thing though. The acknowledgement of the fact that my participation in the course was not purely an accident was very valuable to me. This obligates to completely different behaviors than those taken on beforehand. Through Heluo's teachings the student gradually grows spiritually and emotionally, and matures to take responsibility for the actions and behaviours he takes on now and in the future. He can no longer mechanically copy what he's heard, seen and read because if he did so he would be in conflict with the ideas that Heluo promotes, idea which allows for development and deep understanding of the teaching Feng Shui.

In his courses Heluo teaches how to understand and experience the Qi which surrounds us. He encourages his students to observe Qi and the way it emanates from people, their actions and situations they experience all throughout their lives. During our meeting in May he repeatedly encouraged us to individually examine and judge the many ideas and thesis that are popular today and often quoted in publishings.

What was quite new for me, and I believe for most of the participants, was Heluo's appeal to stop repeating any analogies when practicing Feng Shui. They were developing in the past to simply explain the functionality of the universe to the masses. Heluo is a teacher who expects his students to educate themselves through definitions, facts, and not legends, myths or analogies. What is not logical and scientific cannot be the actual, classic teaching of Feng Shui.

Understanding the inevitable change, change that is so natural and obvious allows to distance yourself from many problems of today's life. The course is not only a Feng Shui seminar, it is also study of the complexity of issues connected with life of an individual and of each situation that can occur in the universe.

There is a thesis, which says that everyone meets such a teacher that he needs in the particular moment, such a teacher he deserved for. This thought has a lot of depth to it. Some of us already are, some will become in the future engulfed in the studies inspired by an exceptional man that Heluo is. This is important and promising that thanks to him we have the chance to penetrate the wisdom of the great Chinese thinkers.

I think that teaching is Heluo's way to improve the situation and the fate of all of us - his, ours, our relatives and those close to us, friends and all the people we might in the future console. This is a grate enterprise and it is worth to join in. All that is left to say is to wish everyone and myself persistence, courage and honesty in learning and practicing of Feng Shui.

### Xuan Kong Feng Shui - Nine Star Ki – Four Pillars of Destiny

I have attended Heluo's classes in Rotterdam and my review is as follows:

Venue: The courses took place in DJOJ. I found this place very peaceful and very happy. Might be the name DJOJ (pronounced as "joy") itself did the trick. My time there is just like a retreat or a spiritual weekend (please note: Feng Shui, Nine Star Ki and Four Pillars have nothing to do with spirituality. Please remember). I quite like the simple vegetarian dishes there. I like the herbal tea there too. I have bought quite a few boxes of tea bags back to the UK as a little treat for myself! The simplicity of the place makes me feel relax and forget everything from the "normal" busy life (might be no television there helps!). I think this environment is the best for me to concentrate and learn.

Course Fee: It is very very good value for money. Okay, see "course book" and "the class" sections for reasons. There are also different discount schemes. As an example, your second course fee within the same season in the same year will be 10% off, and your third course fee within the same season in the same year will be 25% off.

He really does not need to do this to attract students; and, to some of you, you must be thinking that it is too good to be true. I cannot explain this to you. Heluo is a bit crazy, but I think his passion is to share these subjects with as many people in the world as he can. In the past, I did tell my colleagues that he should be registered as a charitable organization. Okay, I don't think I can explain more on this. However, I do hope people could publish their feedback like I did, so that other people could also be benefited. Also, to a lot of practitioners here, I am sure the course fee is relatively nothing.

Course Book: Each course book is as thick as the telephone directory. It is about 5 to 6 centimeters thick and printed on double sides of A4 paper. Okay, thickness of the course book does not mean anything. It could contain a lot of useless or wrong information. However, I have every confidence that majority of the content (if not the whole book) are accurate to the best of his knowledge. I would, indeed, recommend these courses to people at all levels. For beginner, the course book contains genuine information on the subject (I think only a few people could really understand the importance of the last sentence. For those of us who have spent a lot of money on different "variations" of so called "Feng Shui" should understand this). (It is a bit unprofessional to mention Master Yu here. But I think Heluo has done too many Master Yu's courses (i.e. study with Master Yu long enough), I would be very surprised if he does not share the genuine stuff in his Feng Shui and Four Pillars course books with us. I am sure if Heluo is teaching rubbish, Master Yu would have disowned this guy and removed his "Master of Feng Shui" title by now!).

A few highlights on individual course book are as follows:

Feng Shui – I love the quotes of the Chinese Feng Shui classic and its explanations. To me, it is something special and unexpected. If you don't study and understand them, you don't really know about Feng Shui. To me, if the Chinese version of the quotes are also printed, I would be absolutely delighted. A wealth of good quality information is in there. It is, to me, a good handbook on the subject and no doubt, this course book will be with me and generations to come.

Nine Star Ki – I don't have any highlights on this. It is because the whole subject is amazing, an eye opening experience to me. The only word I can describe is "spooky"! (Okay, once again, I don't mean it in a spiritual way). Predicting world events. Looking at the magic square, I can even see myself traveling to Rotterdam to do the course! (I booked the ticket a few good months before I know about 9 star ki). Okay, the last chapter is written in Dutch at the moment, but it is not life threatening. Heluo is working on the translation at the moment anyway.

Four Pillars – His own graphical representation of four pillars works very well with the

traditional format. Also, how to change destiny through behavior and diet are discussed. It might or might not be directly related to the subject, however, I do appreciate a few words were said.

A few chapters are the same in all three course books. But then, the three subjects are interrelated in one way or another after all.

The Class – The course itself ran from Thursday to Sunday. It is good for me because I only need to take the minimum number of days off work. There are about 10 students in average for the three classes I attended. I like small class size. Majority of the attendees are Dutch and their English are pretty good. The classes were conducted in English. A little of Dutch were used very occasionally to ensure the Dutch classmates totally understand the key points before proceed any further.

There were advanced students there and it is true. They took notes seriously, and to me, they still got something to learn in the class.

There is one thing which I think it is worth pointing out, or should I say, set the expectation right. No one can learn Feng Shui, Nine Star Ki or Four Pillars in four days, even if you are a super student and your tutor is a super teacher. The main objective of the four days, to me, is to put you onto the right track, so that you can continue your study, with the use of the course book, in the right direction (sail in the right direction). In other words, to point out the key basics of the subject, so that you can apply and have a good foundation to build on when you want to take the subject further (Also, it is wrong to believe that you will know everything on the subject after the four days. In reality, you can still pick up new things every time you read the course book again).

As an example, Heluo explained the Binary Model of Creation, Twelve Zhong Qi, the Big Dipper and the waxing and waning Qi in the Feng Shui class. In the past, these were the chapters I would have skipped when I read most of the books. I thought they are boring and I don't want to know about them. The subjects might be interesting but I just want to read the Feng Shui bit. Thanks but no thanks. Only when I was forced to listen to him in the Feng Shui class, I can only then realize and appreciate how important they are to the principles of Feng Shui.

Another example. I find it very hard to learn Four Pillars without a person physically to show me how (it is just my style of learning. Apparently, there are four different styles of learning and everyone is different). In the four days, I have learnt at least the basics of the Four Pillars. It is now up to me to study the subject further through the course book and to gain my experience through regular practice.

And the last thing I have to mention (and I am sure a lot of us have the same experience when attending seminars) is to meet a lot of interesting people sharing similar interests and new faces with a very familiar name. It has been my great honor to meet Herman, Vicky, Tony, the wolf lady and a few others.

I have not been paid by anyone to write this. However, if anyone wants to, I am not going to refuse! J : )

### Xuan Kong Feng Shui

I am from Poland. There is very difficult to find good books about Feng Shui and good, responsible teacher of that subject in my country. We have real entanglement of serious Feng Shui with some superstitions here.

I had attended two courses with others here in Poland and I have read almost forty books about Feng Shui as well. But as I see it now, nothing compares to lessons given by Heluo (Roel Hill).

It would be difficult for me to say which aspect of his course is the most interesting or meaningful. Class curriculum? Price? One-module fashion? Heluo as a person maybe? His way of teaching? The atmosphere of that place in Rotterdam? Well, it comes only one answer: that all together is the best thing I have met! Yes, indeed!

Don't you believe me? I will tell you why I find Heluo's courses as especially valuable and worthy of the price.

If it concerns the covered material, I have never seen so much for that price. When I see curriculum of another Master's courses, Heluo's lessons cover usually three or four of their modules. All in one extensive, but clearly and logical given course. Well, you needn't go several times for to get more advanced techniques and as we call them "all these secrets" :o)

Heluo personally - I would need big sea of words for to describe that guy! He doesn't teach you in a normal, boring style. He just captures you and takes for a great journey through Time and Space! Since I crossed the classroom's threshold and got my eyes wide opened - I have been sitting and listening up to last day and last hour - still with my eyes wide opened and asking myself if it really has been happening or was it some beautiful dream.

I have never met any teacher who could explain very difficult and sophisticated subjects in such logical and full of sound reasoning, way. Heluo promises that after his lessons people become independent in their later studying and they get an autonomy. That is all true, he has showed me the way and he has provided me with hints. Now I wouldn't lose my way so easy, as it could happen before the course...

He says he is a teacher. I say - Heluo is not only a teacher. He is also like beloved father, never forgetting about us, his students. He not only teaches us, he gives us a part of his energy, his experience and patience, his responsible way of taking care of the beginners (he takes care of all his students, but especially beginners are the light in his eyes!).

So much for the price, that's it! It's a must!

Malgorzata
